

OPERATION MANUAL

GROM-MST4

**MP3 USB iPhone Android car stereo adapter kit
for fiber-optic stereos**

Optional Bluetooth and AUX-in extensions

MODEL: GROM-MST4-MBO

Fits to the following models:

A-Class (W169) 2004 - 2008

B-Class (W245) 2005 - 2009

C-Class (W203) 2004 - 2008

CLK-Class (C209, W209) 2004 - 2008

CLS-Coupe (W219) 2005 - 04/2008

E-Class (W211) 2004 - 04/2008

GL-Class (X164) 2006 - 2008

ML-Class (W164) 2006 - 2008

R-Class (W251) 2006 - 2008

S-Class (W220) 2004 - 2006

SLK-Class (R171) 03/2004 - 04/2008

1. EXT1-EXT2 PORTS - Accessories Cables Connection

Connect the cables to the appropriate slots available on GROM-MST4 (see above illustration).

EXT1- connect GROM Bluetooth Dongle

EXT2- connect GROM Bluetooth Dongle or AUX-In 3.5mm cable

Note: You can connect GROM Bluetooth Dongle to either the EXT1 or EXT2, and AUX cable only to the EXT2.

3. Quick operation steps

3.1 MODE Selection

1. Press **AUDIO** button and choose **CDC** to enter into GROM mode. It is usually USB by default, so if the USB flash drive with the music is connected – the music will start playing. (For standard non-navi stereos, Simply press **CDC** to enter into the GROM mode.)

2. To switch between USB or AUX (EXT2) you will need to do the following steps:

-Switch to DISC 6 and Select TRACK 2. It will switch the MODE to the next. Do steps again to switch to the next MODE, order in USB, AUX

***To distinguish which is current MODE for stereos with no text display capability, have the stereo already in CDC mode (GROM Mode) -->press RADIO -->wait 1-2 second -->press CDC (GROM Mode).

You will hear the current Mode announce (USB or AUX).

Press AUDIO
Then Select CDC
(GROM MODE)

4. USB MODE - Android Operation

4.1 Android Device Setup and Operation

The GROM-MST4 adapter when in USB mode allows you to connect your Android device directly to the GROM-MST4 USB port. You will need the GROM DashLinQ app available on the Google Play store / Android marketplace for free. Once you have DashLinQ installed on your Android device, you can connect your Android to the USB port using your own or provided USB Android connector cable. The USB port will also charge most Android devices (not all supported).

Depending on the version of your Android software and the phone model, you might need to disable or enable the USB Debugging option on your phone. If you plugged in your Android phone to the GROM device, and your adapter is not working, please go to the phone settings and either enable or disable the USB Debugging function.

1. To enable/disable USB Debugging, on Android device go to Settings ◊ Applications ◊ Development
2. Once you connect your Android device to GROM-MST4 and the GROM unit is in USB playback mode, DashLinQ should automatically start playing a song from your Android device.

Android and USB stick functionality is essentially identical. Playlists on DashLinQ will be mapped to Discs on the stereo. Skip tracks, change disc, fast forward, random, scan controls are identical to USB controls. Text of current song is displayed.

Disc 1 = On The Go

Disc 2 =

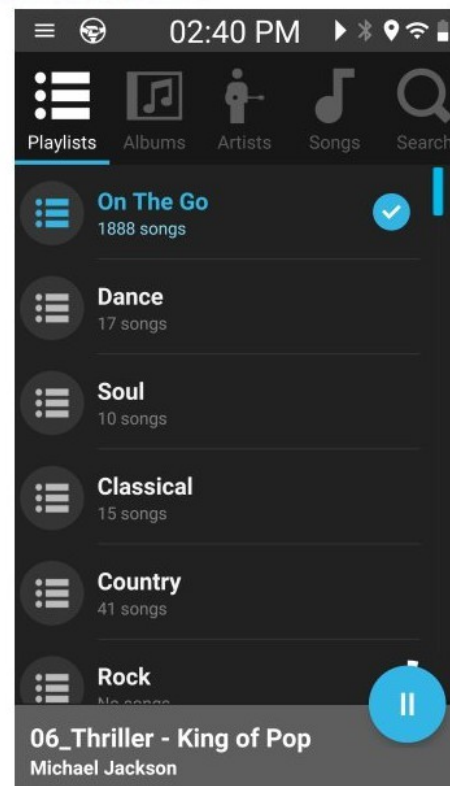

Disc 3 =

Disc 4 =

Disc 5 =

Disc 6 =

Current Song =

Disc 1 will play “On The Go” playlist on the DashLinQ app. Disc 2 or higher are your other playlists.

The playlists are assigned to the certain Disc according to the time of playlist creation.

Troubleshooting:

Symptom	Cause	Remedy
No music is coming from the car speakers or sound is distorted	GROM-MST4 is in the wrong mode	Make sure that you are in the USB playback mode
You can't hear the music in DashLinQ	An empty album or playlist is selected on the DashLinQ	Make sure that you select a playlist that has songs and it is not empty.
Music is not playing	USB Debugging should be turned on or off	To enable/disable USB Debugging, on Android device go to Settings → Applications → Development

5. USB MODE – USB stick / flash drive / external hard drive operation

5.1 Supported USB Storage Devices

All FAT / FAT16 / FAT32 formatted storages:

- USB sticks/hard drives
- Android phone with DashLinQ app (most supported)

The GROM USB supports only FAT / FAT16 / FAT32 formatted storages. NTFS and exFAT are not supported!

5.2 Supported formats

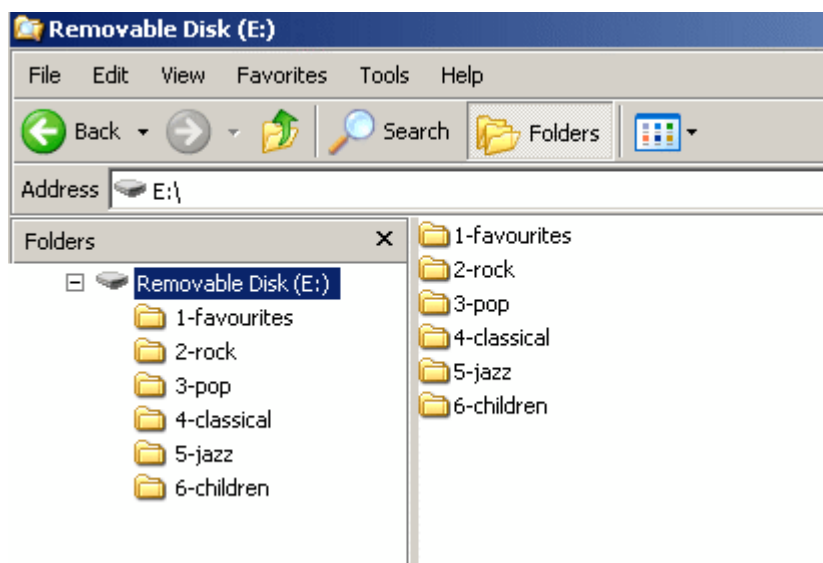

The GROM-MST4 supports the following formats:

- FLAC lossless
- MP3 with bitrates up to 320Kbps
- WMA with bitrates up to 389Kbps
- AAC / iTunes with bitrates up to 389Kbps
- OGG/Vorbis with bitrates up to 389Kbps
- VBR/CBR

Note 1: No digital rights management (DRM)-protected content will play directly through the GROM-MST4-VOLSO adapter as such content is encrypted and signed by the media publisher.

Note 2: AAC files stored on USB Flash Drives may have a delay of 5-10 seconds before the music starts playing.

5.3 USB Directories/Folders Setup

- You must set up the PLAYLISTS (FOLDERS/DIRECTORIES) on your USB device. You will need to set up at least one playlist. Without playlists the MST4 interface will not play the music.
- Create one directory (folder) for each disc your stereo supports. For Volvo with Single CD you can create up to 59 folders/playlists, and there is no limit for the number of the tracks in each folder.
- Name them with numbers (i.e., 1-Pop, 2-Rock, 3-Classic, etc); save all of your music into these directories.
 - As soon as you connect the GROM-MST4 adapter to a USB portable data medium, GROM will translate root directories into virtual discs.
 - We recommend that you have as many directories as possible on a root level as the car stereo will not recognize subdirectories. The GROM itself will enumerate subdirectories and turn them into a flat list of tracks.
 - If filenames in a certain directory begin with digits, they will be played in ascending order based on the order of those digits in the filenames. For example:
 \1-Dance\My songs\
 1. Track.mp3
 2. Track.mp3 (will play first according to the number)
 - If filenames begin with letters, they are played in ascending order of the file creation date/time.
 - If root directory starts with the number, the directory will be assigned to a respective virtual disc.

All MP3, WMA, iTunes, FLAC and OGG tracks will be enumerated and found once you select the appropriate disc.

Check USB Drive Setup guide at http://gromaudio.com/docs/Grom_USB_Setup.pdf

5.4 USB Basic Features

The GROM-MST4 adapter has the following functionality:

- Every directory in a root of the USB portable data medium becomes a virtual disc. Playlist on Android become virtual disc. Please note: directories with non-audio files (e.g., pictures, documents) located in the root will be recognized as empty virtual discs.
- All audio files within the root directory are enumerated and treated as TRACKS.
- The following operations are supported by the GROM-MST4:
 - o Change virtual disc/playlist
 - o Change tracks forward and backward
 - o Display track # and track title where available
 - o Restore last positions for up to 4 USB sticks
 - o Restore last playlist positions in up to 20 virtual discs

6. iPod/iPhone/iPad operation through USB port with compatible iPod cable

Once in the USB mode of GROM with iPod/iPhone/iPad plugged into to USB port of GROM the following operation are available:

A. Simple mode (iOS device stays unlocked) :

1. Push or Select Disc № 1 button on the stereo, the GROM will operate in Simple iPod Mode.

iPod stays unlocked. Your iPod can be controlled via its clickwheel or via car stereo controls. The information displayed on your car stereo does not represent the actual song position on the iPod (the song's number). There is no need to prepare your iPod/iPhone/iPad to play in this mode.

2. Available operations:

- Next track – use SEEK+ button
- Previous track – use -SEEK button
- Fast Forward –press and hold SEEK+ button
- Fast Reverse –press and hold -SEEK button

B. Advanced mode:

1. Press or Select Disc 2 button, GROM will enter into Advanced iPod Mode Folder/Playlist 1

Your iPod is locked for control and only operated via car stereo buttons. iPhone and iPad are unlocked. You can see current information such as track time, number and playlist (disk) number. Text is also available for certain stereos. In order to use this mode you have to prepare your iPod/iPhone/iPad as explained later.

The advanced mode is always on for playlists 2 and up.

2. "Ok to disconnect" is shown on the iPod display while it is connected to this unit. The clickwheel of the iPod is disabled when in this mode.

3. Available operations:

- Next track
- Previous track
- Next Playlist/Folder
- Previous Playlist/Folder

4. Playlist set up for Advanced Mode

To use your iPod in Advanced Mode you have to define playlists. We recommend naming the playlists starting with the number according to the desirable disk position.

1. Andy's songs
2. Kids
3. Disco dance
4. Favorites
5. House rhythms and so on.

If your iPod/iPhone/iPad does not have playlists/songs it may cause unpredictable outcomes and improper operation of the unit.

EMPTY PLAYLISTS MAY ALSO CAUSE UNPREDICTABLE BEHAVIOURS, ESPECIALLY EMPTY PLAYLISTS THAT ARE LOCATED IN THE MIDDLE OF ALL OTHER PLAYLISTS.

C. WHEN THE CAR IGNITION IS OFF

When you turn your car stereo or car ignition off, the iPod /iPhone/iPad will automatically will go into sleep mode. In the sleep mode, the iOS device will still consume power—although very little—from the car battery. There is no need to disconnect the iPod every time you turn off your car.

However, it is strongly advised that you disconnect the iPod if you do not plan to operate your car for one week or more.

7. USB and iPod MODE Operation Troubleshooting

Symptom	Cause	Remedy
No music is coming from the speaker	GROM-MST4 is in the wrong mode	Make sure that the correct mode (USB or AUX) is selected. Please refer to the chapters 2-3 of this manual.
The music is distorted.	GROM-MST4 is in the wrong mode	Make sure that the correct mode (USB or AUX) is selected. Please refer to the chapters 2-3 of this manual.
You can hear the music from the iPod but you can't control it from the stereo	iPod needs to be reset	Reset the iPod (resetting will not erase your music, it will only restart the iPod)
You can't hear the music from USB, Android or iPod/iPhone/iPad	An empty album or playlist is selected on the USB, Android or iOS device	Make sure that the non-empty album or playlist is selected on the USB, Android or iOS device
The music is distorted	EQ or BASS boost options are turned ON on the iPod/iPhone/iPad	Make sure all EQ and BASS boost options are turned OFF on your iPod/iPhone/iPad
The player is skipping the playlists on USB	You have empty playlists	Make sure there is no empty playlists on the USB drive

8. Bluetooth and AUX-IN

Note: Bluetooth Dongle and AUX cable are sold separately.

In the AUX mode you can connect any audio source via GROM MiniDin to 3.5mm phone jack cable.

8.1 AUX-IN input

You can connect any audio source via GROM MiniDin to 3.5mm phone jack cable (please refer to the section 1.8 of Install Manual, "optional accessories"). The GROM 3.5mm cable connects to the EXT2 port on the GROM-MST4 adapter and provides AUX-IN for any audio device. The charging USB connector on the GROM auxiliary cable (if available) provides 5V USB charging for most mobile devices.

To start using GROM as the auxiliary adapter, simply connect your audio source to the 3.5mm phone jack (EXT2) and then turn the audio source ON. Your stereo should be in the **AUX** GROM mode. Please refer to the Chapter 3.1 of this manual on the MODE changes.

If the stereo is ON and in the CORRECT MODE – the device will be ready to play. You can control the connected device using its own controls. Please regulate and adjust the volume on the connected device for proper audio levels.

You can connect MP3/DVD player, Satellite and many other audio devices that have 3.5 mm plug. If your device has a different type of connector (RCA, 2.5mm, etc.) you can buy an extension adapter at your local stereo store or on GROM website.

Note: When the ignition is OFF the adapter will not automatically shut down the AUX-IN device. Please make sure to turn off the AUX-IN audio source manually. If you plan not to operate your car for one week and more, please disconnect AUX-IN audio source from the adapter. When you are using GROM-MST4 in a different mode other than AUX, please turn off AUX-IN audio source.

8.2 BLUETOOTH Dongle

You can also connect GROM Bluetooth Dongle (GROM-BTD) to the EXT1 or EXT2 port on the GROM-MST4 adapter for the hands free use of your mobile phone and wireless music play. Please refer to the GROM Bluetooth Dongle manual that is supplied with your Bluetooth Dongle. You can also access the manual online at GROM Audio website:

http://gromaudio.com/docs/bluetooth_manual.pdf.

If for some reason you need to reset the Bluetooth:

Switch to DISC 6 and Select TRACK 3 and wait. Should hear 2 low beeps from the speakers indicating reset. If your phone was connected to grom-car, when you do the reset it will disconnect from Bluetooth. If you have an old grom-car on the Bluetooth menu of your phone delete it, a new grom-car will pop up after the reset.

8.3 Disc 6 – GROM menu

DISC 6 is GROM Menu.

Track 1 BootLoader/Firmware Version

Track 2 Change GROM Modes (USB, iPod, AUX)

Track 3 Bluetooth Reset

Track 4 Enable/Disable USB Streaming

9. Support and Warranty

For technical support, please visit <http://gromaudio.com/support.html> and fill in the web form. The first available representative will answer your question.

For warranty information please refer to your Installation Manual.
